Countries and regions served globally

Who Do We Serve

- Dental Clinics
- Dental Labs
- Distributors
- Clear Aligner Providers

Why Choose Us

Treatment Planning

Created by professionally educated dentists, most of whom have independently served over 1000 patients.

Automation

Efficiency tripled compared to manual processes, with manufacturing lead times as short as 3 working days.

Biomaterial

Self-developed biomaterials for optimal clarity, elasticity, and strength, tailored for effective aligner treatment.

AI Powered Software

Built with advanced algorithms, leveraging the latest AI-powered tools to enhance treatment precision.

SmileyNova Pro

Pro

Your easiest and best choice for branded clear aligners, offering an efficient and user-friendly portal, AI-powered treatment planning, advanced biomaterials, automated production, and, most importantly, highly competitive pricing.

Private Label

We manufacture high-quality clear aligners under your brand name. By partnering with us, you can reduce overhead costs and maintain control over your brand while ensuring the highest standards in product quality.

Treatment Planning

Our treatment planning process combines cutting-edge AI-powered software with the expertise of professional orthodontists. The advanced technology allows us to create precise, patient-specific treatment plans more efficiently than ever before.

Aligner Material

Our self-developed materials are designed for optimal clarity, flexibility, and strength, providing the ideal balance for effective and comfortable treatment.

Portal Setup

We offer comprehensive support in setting up your operating system or management portal for clear aligner case management. With our solutions, you can streamline workflows, reduce errors, and enhance overall operational efficiency.

Equipment and Production Line

We provide a wide range of solutions for clear aligner production, including 3D printers, thermoforming machines, cutting & trimming equipment, laser markers, packaging machines, and polishers, tailored to align with your production needs.
